Expertise

- HTML 5
- CSS 3
- JAVASCRIPT
- REACT JS
- REDUX
- MATERIAL UI
- ANT DESIGN
- GIT
- GOOGLE CLOUD PLATFORM (GCP)
- FIREBASE

Experience

Mar 2022 - Present

SmartQ

Front End Developer

- Developed responsive web applications with React, Redux, and Material UI.
- Maintained clean, efficient, and best-practice-compliant React codebase.
- Deployed applications on Google Cloud Platform (GCP).
- Researching and evaluating new frontend libraries, tools, and techniques that can enhance the development process.
- Fixed UI bugs.
- Addressed bugs and implemented code reviews for React web apps.
- Participated in code reviews, offering valuable feedback to team members.
- Stay updated with React trends and best practices.
- Work in an agile team, participate in code reviews, and document.

Jun 2020 - Mar 2022

THIS IS! Digital Media Group Thailand Company Limited

Full Stack Developer [React.JS & Java Springboot]

- Developed and maintained React applications for web using Class and Functional components.

- **JAVA**
- **SPRING BOOT**
- **PostgreSQL**
- **REST API**

Education

2013

Bachelor of Engineering In Electronics

Visvesvaraya Technological
University

Achievements

Above & Beyond

By SmartQ for coding &
improving applications
Optimization, Performance &
Stability.

R&D Award

By SmartQ for researching &
building an application to
manipulate data in GCP by
google SSO.

Spot On Award

For best performer in
Mindtree.

Unstoppable Award

Worked as individual
contributer in a project in
Mindtree.

- Implemented state management using Redux & Context API.
- Optimized application performance for speed and scalability using Memo, useMemo & useCallback hooks.
- Additional libraries used with React, including React Router, Redux, Material UI, and Recharts.
- Debug and troubleshoot UI issues, ensuring smooth functionality.
- Designed and implemented RESTful APIs effectively using Java, SpringBoot & PostgreSQL.
- Deployed code using filezilla, cicc gitlab & aws repositories by remote code commit.

Jan 2015 - Oct 2019

Mindtree

Senior Software Engineer

- Created modular and reusable React JS class based components from design mockups.
- Seamlessly integrated React UI components with backend APIs.
- Along with React JS, Redux and Ant Design were used.
- Deploying and maintaining backend applications using Java & springboot.
- Defined API endpoints, request/response models, data serialization for efficient communication & API documentation using swagger.
- Utilized Spring Data JPA for efficient database operations and query management.
- Developed backend microservice using Eureka Server-Client dependencies & Rest template.
