Expertise

- **HTML 5**
- **CSS 3**
- **JAVASCRIPT**
- **REACT JS**
- **REDUX**
- **MATERIAL UI**
- **ANT DESIGN**
- **GIT**
- **JAVA**
- **SPRING BOOT**
- **PostgreSQL**

Experience

Mar 2022 - Present

SmartQ

React Developer

- Developed responsive web applications with React, Redux, and Material UI.
- Maintained clean, efficient, and best-practice-compliant React codebase.
- Deployed applications on Google Cloud Platform (GCP).
- Researching and evaluating new frontend libraries, tools, and techniques that can enhance the development process.
- Fixed UI bugs.
- Addressed bugs and implemented code reviews for React web apps.
- Participated in code reviews, offering valuable feedback to team members.
- Stay updated with React trends and best practices.
- Work in an agile team, participate in code reviews, and document.

Jun 2020 - Mar 2022

THIS IS! Digital Media Group Thailand Company Limited

Full Stack Developer

- Developed and maintained React applications for web using Class and Functional components.

- **REST API**
- **FIREBASE**
- **GOOGLE CLOUD PLATFORM (GCP)**

Education

2013

Bachelor of Engineering In Electronics

Visvesvaraya Technological University

Achievements

Above & Beyond

By SmartQ for improving in code optimization, performance & stability.

R&D Award

By SmartQ for researching & building an application to manipulate data in GCP by google SSO.

Spot On Award

For best performer in Mindtree.

Unstoppable Award

Worked as individual contributer in a project in Mindtree.

- Implemented state management using Redux & Context API.
- Optimized application performance for speed and scalability using Memo, useMemo & useCallback hooks.
- Addational libraries used with React, including React Router, Redux, Material UI, and Recharts.
- Designed and implemented RESTful APIs effectively using Java, SpringBoot & PostgreSQL.
- Defined API endpoints, request/response models, data serialization for efficient communication & API documentation using swagger.
- Utilized Spring Data JPA for efficient database operations and query management.
- Developed backend microservice using Eureka Server-Client dependencies & Rest template.
- Deployed code using filezilla, cicd gitlab & aws repositories by remote code commit.

Jan 2015 - Oct 2019

Mindtree

Software Engineer

- Created modular and reusable React class based components from design mockups.
- Seamlessly integrated React UI components with backend APIs.
- Built internal projects using React, Redux, and Ant Design.
- Deploying and maintaining backend applications using Java & springboot .
- Employed Spring Boot for simplifying database operations, including CRUD operations and query handling.
- Used Spring Data JPA for smooth database operations and queries.
- Developed Java and Selenium projects with TestNG for automation efficiency.
